Big Ideas:

1. Historians investigate the past by:
 - framing problems to study
 - selecting and analyzing available evidence
 - organizing their information
 - creating the account
2. Four tools that historians use to organize information include significance, social institutions, temporal frames (time), and spatial scales (space).
3. Ideas about significance can vary among historians.
4. We can determine whether an event is significant by constructing and applying rules or theories about what makes an event important.
5. Organizing an account by significance is important for both the historian and reader.
