Lesson Abstract:

In this lesson students explore important trends and patterns of development during Era 2. Through discussion activities around information presented in a PowerPoint presentation, students begin the lesson by considering the rise and fall of kingdoms in this period and analyze the common features of these kingdoms. Students then connect the previous lesson on technology and cultural diffusion to the steady growth of the human population in this era. Finally, students engage in an inquiry activity around learning stations to explore the different types of interactions – both conflict and cooperation – that took place within farming societies, across farming societies, and between farming societies and pastoral nomads. The lesson ends with a group analysis of patterns across the stations and an exit slip asking students to make larger generalizations about conflict and cooperation in Era 2.
